

## Year 5 Weekly Challenge 4

This is a colour wheel showing both the primary colours (red, yellow and blue) and the secondary colours (orange, green and purple) which can be made by mixing two of these together. For example, orange is made from mixing red and yellow which is why it is positioned in the middle of these two on the wheel.

We would like you to create your own colour wheel. You can be as creative as you like – use paint, collage, Lego, food objects around the house...

Please take a photo of the colour wheel you create and send it to either:
